

Education

Dr. Rammanohar Lohia Avadh University Ayodhya

2021-25

B.Tech in Information Technology

Experience

G2V Technologies

Oct. 2023 - Present

Associate

Noida

- Worked as Quality Analyst for Social Media Marketing focuses on ensuring the quality and effectiveness of social media campaigns and content.
- Offering constructive feedback to other employees on their social media activity and customer interactions.

Projects

Twitter Sentiment Analyzer

- Developed an elastic web application using Google Cloud Platform APIs which provides sentiment analysis of trending songs and movies by extracting top trending tweets; utilized Google App Engine for deployment and auto-scaling.
- Implemented the load generator to test the scalability of the application by generating 500 concurrent requests and 15000 user requests using Apache Beam.

Music Streaming Web App

- Coded and deployed full-stack web app incorporating features like OAuth-based login/sign up, play songs, view detail of song, view recently played songs, create multiple playlists, and search and filter songs based on singers and languages.
